

Dr Tanmaya Talukdar, Professor and HOD

From the HOD's desk:

The Department of TB & Chest Diseases / Pulmonary Medicine became a separate entity on November 2012 with the objectives of providing quality care to patients concerning Chest Diseases and also to provide optimum medical teaching as per Medical Council of India to the students of Lady Hardinge Medical College (LHMC).

Since its onset, the department has been providing daily OPD services to the visiting patients. Specialized care in Respiratory Allergy, Smoking Cessation, Respiratory care in persons living with HIV/AIDS, TB Diagnosis and Treatment etc. are provided by the Departmental team of faculty and senior residents.

Under the Comprehensive Redevelopment Plan of LHMC the department is going to provide services such as Interventional Pulmonology, Allergen Specific Immunotherapy, Advanced Pulmonary Function Testing and diagnosis and treatment of Obstructive Sleep Apnoea. With this re-development program the Department looks forward to imparting post graduate teaching in the speciality of Pulmonary Medicine.
