

Letter from HOD Desk

Dr.Ritu Majumdar

The Department of Physical Medicine and Rehabilitation (PMR) provides Medical rehabilitation services to Children & Adults with physical impairments & disabilities.

Medical consultation is given by Faculty, senior residents trained in the field of PM& R.

There are Allied Health Professionals in the department viz. Physiotherapists, Occupational Therapists, Speech therapist, Clinical Psychologist & Prosthetist & Orthotist providing their services.

Department recently got permission to start MD course in PMR with an intake of 2 seats per year from academic session 2022-23 affiliated to University of Delhi.

We are very thankful to National Medical commission for making speciality of PMR mandatory for M.B.B.S course curriculum. We have started taking regular classes of undergraduate students from the year 2021. Inclusion of disability competencies in foundation course of Competency based medical education will prove very useful for the students as they will learn the skills & attributes essential to provide quality health care to patients with disabilities.

We aim to have a full fledged department with teaching and training facility to postgraduate students as well as integrate with other departments to provide holistic rehabilitation to children & adults suffering from physical impairments & disabilities.

Jai Hind.
