

### **Letter from HOD Desk (Dr. R.S. SOLANKI)**

It is my great pleasure to share my views as the Head of the Department of Radiodiagnosis & Imaging, on the official LHMC website. We pride ourselves to be associated with LHMC, with the commitment to provide quality and holistic education, training & research, which ultimately translate medical benefits to the community we serve. We provide evidence-based diagnostic & interventional patient services, and our primary concern has always been the well-being of our patients. Our department is also committed to empower our faculty, researchers and students with knowledge, skills and vision to meet the challenges and opportunities of a rapidly changing field of Radiodiagnosis & Imaging. The department heartily welcomes, with open arms, all those hard working young faculties and students who have a desire to attain the clinical, research & academic excellence in the field of Radiodiagnosis & Imaging.
