

2. Mission/ Vision Statement

The department is striving to create dedicated stroke services and start thrombolysis for stroke patients at LHMC in the near future. Furthermore, the department aims to expand on the number of electrophysiological tests that are currently being provided by scaling up the NCV-EEG lab services. The department also aims to grow in size by recruiting more faculty and senior as well as junior residents for smoother and more efficient functioning. The long-term vision for the department of neurology would be start a DNB neurology course at LHMC, so that super-specialty training can be imparted to post graduates of medicine in the field of neurology.
