

## **Vision**

To develop and implement outstanding educational programs for medical graduate and postgraduate students in Anatomy and to develop a well equipped department of Anatomy with latest laboratory technologies in Gross anatomy, medical cytogenetics & molecular biology to train our medical graduates and assist our clinicians at diagnostic, therapeutic & prognostic levels.

## **Mission**

- To impart basic and clinical knowledge of anatomy to Undergraduate MBBS & Postgraduate MD students and students of Allied sciences of various streams to enable them to understand the basis of medical sciences.
- Active involvement in multidisciplinary research in Gross anatomy, Histogenesis, Embryological basis of growth and disease, Neuroanatomy, Medical Cytogenetics.
- To promote the professional and personal growth of our faculty, students and staff with special emphasis on developing and learning, update their knowledge in newer upcoming fields in medical sciences. To encourage faculty and residents to participate in various national and international conferences, symposiums and workshops to update their knowledge in recent upcoming fields.
- To conduct various Hands on cadaveric training workshops and create skill labs in collaboration with surgical and radiological departments to further improve the skills of medical professionals pursuing higher studies or clinical training.
- To promote the noble cause of Voluntary Body Donation and create a wide spread public awareness and support for the cause.
- To make the subject of anatomy so relevant that it attracts medical graduates to pursue higher studies in this field and voluntarily opt to work in this Specialty.
