

## **Research work**

Correlation of genetic polymorphism and altered expression of serum markers of appetite and lipid metabolism with atypical antipsychotic induced weight gain in schizophrenic patients – A Prospective observational study. (completed)

Serum Angiotensin converting enzyme (ACE) level in patients of Migraine and Non-Migraine Primary Headache Disorder. (completed)

Vitamin D receptor polymorphism in type 2 diabetes mellitus patients. (completed)

Association of serum metallic ion levels in patients with total joint arthroplasties with their adverse effects: A comparative cross-sectional study. (ongoing)

Association of genetic polymorphism of APOA1, PCSK9, APOE with response to statin therapy in dyslipidemic patients: A prospective observational study. (ongoing)

Effect of anti- epileptic drugs on serum biomarker S100B in persons with epilepsy (ongoing)
